HOW TO HAVE A GOOD SOIL.

outsibute, but this is far more potent THE EXPRAST HOUSE One the whole of them. We are fast becoming a nation of schemers to live without work. Boys are not learning The question of deep plowing, which trades, furners' sons are crowding into we had supposed definitely settled long the cities, looking for clerkships and states, is again being brought forward, and the discussions are assuming a very spirited style. Subsoil ploughs, which wages, however argent her need; so we spirited style. Subsoil ploughs, which give region with a subsoil ploughs, which give region and ploughs which have some years since, have almost entirely disappeared, though had no deep plowing has taken a stronger hold than ever. Of comes the depth of prowing should be in proportion to the depth of soil. It will not do to plow twelve inches deep where the contract which is the many part of an individual to the producers, many be complete with a soil of the contract of an individual to the many parts of an individual to the many parts of an individual to the many parts. softwe soil is only six. This may be proper worth of an individual is life or done in the course of time, but not at her capacity for contributing to the welnone in the course of time, our not at time capacity for contributing to the wel-once. To make a good deep soil, the face of the community at large- helping progress downward should be gradual, to do that which will obviate the neces-Let a proper portion of the subsoil be sity of sending elsewhere to have it brought to the surface and be exposed done, and thereby keeping within that to the action of the san, rain, wind and community its substance, represented frest, that ach the minumes to render it. by money, "Twice A Wick. forther the pursuing this plan for sur-ferfile. By pursuing this plan for surcrossive years, a fertile soil can be made one that will resist the effects of severe to uncertain riches, but prepare your-

drength, and be fitted also for the suc-cessful entryation of all ordinary crops.

To this more than 15 ordinary crops. Es this means the innecal constituents of the subset become thoroughly inter-or the about become thoroughly inter-or, one one of the surfaces. Above all, do not esteem too lightly accord with the soil of the surface, which in consequence of off-repeated shollow plowings has been depleted of the marker a good soil by this nathod, the plowing should be done in the fall, in order that the newly furned up subsoil may be subjected to the anchorating influences of the winter's receing and flawing. But after all this is done in this is done, it will be found that good crops cannot be produced unless there is a crops cannot be produced unless there is unventors are all present giving their in.

will have a good soil and a bountiful see of machinery now propelled by steam.
